

The first week of July I celebrated my 32nd year practicing dentistry in Warsaw. I have had the pleasure to work with wonderful dental professionals and serve the dental care needs in our community. I am very proud of our team and the level of dental care that we provide. Our level of care requires dedicated, skilled, high-level providers and we look forward to Dr. Dennis Pitsilides joining our team to continue and expand that care. I would like to welcome him and introduce him to our practice and community.

Dr. Dennis Pitsilides grew up in Schererville, Indiana. He graduated with his Bachelor of Science in Biology and then went on to complete a Master of Science in Biology at Purdue University. He earned his Doctor of Dental Surgery from Herman Ostrow School of Dentistry at the University of Southern California in 2023. In his free time, Dr. Dennis enjoys tennis, hiking and kayaking on the lake.

Dr. Dennis is grateful for the opportunity to expand his education and skills under the guidance of Dr. William Myers. Being a part of a practice with the latest dental technology that renders high quality comprehensive dental care is what drew him to Warsaw. He looks to help grow a strong relationship with the community, while continuing to provide compassionate care to our patient's needs. Dr. Dennis will be joining Dr. Myers and his amazing team on August 7th to provide personalized care to the Warsaw community. Please call 574-267-6651 to schedule an appointment with Him.

Dr. William N. Myers
